

## Websites: The ACE Study

- [www.cdc.gov/nccdphp/ace](http://www.cdc.gov/nccdphp/ace) **ACE Study.** The Centers for Disease Control and Prevention reports on the Adverse Childhood Experiences (ACE) Study - one of the largest investigations ever conducted on the links between childhood maltreatment and later-life health and well-being. As a collaboration between the Centers for Disease Control and Prevention and Kaiser Permanente's Health Appraisal Clinic in San Diego, Health Maintenance Organization (HMO) members undergoing a comprehensive physical examination provided detailed information about their childhood experience of abuse, neglect, and family dysfunction. Over 17,000 members chose to participate. To date, over 50 scientific articles have been published and over 100 conference and workshop presentations have been made.
- [www.cestudy.org](http://www.cestudy.org) The **Adverse Childhood Experiences Study.** Primary focus is to share the findings of the Adverse Childhood Experiences Study, in a format readily accessible to both professionals, and the lay community. A free, electronic, quarterly publication, ACE Reporter, about the findings of the Study is available on line.
- [www.aceresponse.org](http://www.aceresponse.org) The **ACE Response** website was developed through a partnership between the [University at Albany School of Social Welfare](#) and [Prevent Child Abuse America](#), to bridge the gap between ACE research data and its potential for real world application to prevent ACEs and ACE consequences through policy and program leadership, community development, and direct practice. From a [policy](#) perspective, an important reason for preventing ACEs and ACE consequences is cost-savings. A goal of this site is to connect policymakers and leaders to information about ACE-informed policies and cost-savings studies that have been developed or proposed.
- [www.theannainstitute.org](http://www.theannainstitute.org) **The Anna Institute** website includes a section devoted to The ACE Study. To make ACE study findings and implications easily available and accessible to the general public and health, behavioral health and human service professionals, this section includes full downloadable pdf articles on ACE Study findings, resources and documents including ACE Study questionnaires, and powerpoint slide presentations with notes for the use of those who wish to share this groundbreaking study with others.
